A cashless society is one in which people use digital payments such as credit cards, mobile apps, and online banking instead of cash. This trend has grown rapidly in many countries, especially with the rise of smartphones and contactless payment systems. One advantage of going cashless is its efficiency and simplicity. Transactions are faster, and people do not need to carry cash. Digital payments also make it easier to track expenses and reduce the risk of theft. Governments and businesses can benefit from increased **transparency** and lower costs of printing and handling money. However, there are disadvantages. People without digital tools, such as the elderly or low-income groups, may find it difficult to make payments. Privacy is also a concern because electronic transactions can be tracked. Additionally, technical problems or cyberattacks can disrupt payments. Despite these challenges, many experts believe that using digital payments will continue to grow and change how we pay, save, and manage money.

In February 2025, Taiwan achieved an important victory by defeating Spain 6–3 in the World Baseball Classic qualifiers. This win not only allowed Taiwan to advance to the 2026 World Baseball Classic, but also showed how valuable it is to stay strong after a setback. Only a week earlier, Taiwan had lost badly to Spain with a score of 5–12. Instead of feeling discouraged, the players reflected on their mistakes, searched for solutions, and quickly made adjustments. Their determination and ability to learn from failure became the foundation of their success.

This victory offers more than just a sports result. It reminds us that even after losing, it is still possible to fight back and win. As long as people do not give up, they can attain surprising achievements. This perseverance is not only essential for athletes but also for anyone who hopes to build resilience for the future.
